

COMPANY BACKGROUND

Barloworld Logistics is an international provider of smart supply chain solutions in partnership with leading clients. Backed by the 110 year old Barloworld Group, its international footprint has grown to include operations throughout southern Africa, Europe, the United States, the Middle East and Far East.

Barloworld Logistics has developed numerous in-house and world-class competencies and has entered into smart partnerships with key industry players.

By combining a smart approach with innovative thinking and supply chain foresight, it designs, implements, manages and operates smart supply chain solutions that deliver on its clients' strategies and drive bottom line growth.

HOW BARLOWORLD LOGISTICS USE TRUCKSCIENCE

Barloworld Logistics has been using TruckScience extensively for over 10 years as an integral part of the decision making processes in the organisation.

"We use TruckScience for absolutely everything we do. It is a vital business tool. We run all vehicle simulations through TruckScience before completing our costings."

Adrian Van Tonder, Business Development, Barloworld Logistics

Barloworld Logistics also uses TruckScience to **ascertain fuel consumption on various routes so that they can predict the consumption of different configurations.**

"I build the truck/trailer configuration in TruckScience, load it and indicate the proposed routes to be travelled. It is simple to use and gives a great guideline on costings for each job."

Adrian Van Tonder, Business Development, Barloworld Logistics

They also use TruckScience calculations as a **performance benchmark for their drivers.**

"We give each driver a benchmark of what the fuel consumption should be for that vehicle and the driver gets measured against that on an ongoing basis."

Adrian Van Tonder, Business Development, Barloworld Logistics

When procuring new vehicles, Barloworld Logistics can use the **comparison listing on the program to help the selection process.**

"I believe TruckScience to be one of the best decision analysis tools in the industry."

Adrian Van Tonder, Business Development, Barloworld Logistics

CORE BUSINESS BENEFITS

PREDICTING FUEL CONSUMPTION

Barloworld Logistics uses TruckScience to cost each job so they can accurately predict and hence maximize fuel consumption.

PERFORMANCE BENCHMARK

TruckScience calculations and timings are used as a benchmark to measure the performance of Barloworld Logistics vehicles and drivers.

VEHICLE PROCUREMENT

TruckScience helps us compare vehicles for each contract ensuring we buy the right vehicle for every job, every time.
